

# SafeNet Access Management and Authentication Solutions

Enable your organization to thrive with simple, secure access to all your apps

Despite the operational and efficiency benefits that cloud services offer, their adoption has accelerated the disintegration of traditional security frameworks, creating new risks, especially when protecting identities.

In today's reality, in which stolen credentials are the primary cause of data breaches, ensuring employees, consultants and contractors can access applications securely – anywhere, on any device – is foundational to enterprise growth and success.

Thales's access management and authentication solutions enable your organization to thrive with simple, secure access to all your apps, by applying authentication everywhere.

Thales helps you discover where your data is, who your users are, and map out their specific authentication needs. We protect your environment by allowing you to expand authentication to all users and apps with diverse authentication capabilities. And we give you the power to control access to all apps with the right policy that enforces the right authentication method for the right user.

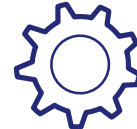

## Discover

Discover who your users are, and the specific needs of their authentication journeys.

## Protect

Protect more users by implementing access policies and authentication across your IT environment.

## Control

Monitor and control risk with real-time continuous policy enforcement.

## Industries We Address

 Government	GDPR, PSN, CJIS-SP
 Manufacturing	eIDAS, MCA-21
 Healthcare	HIPAA, HITRUST, EPCS
 Financial Services	FISMA, FFIEC, PCI DSS
 Critical Infrastructure	NERC
 Telecom and Service Providers	
 e-Filing Public Services	

## Use Cases We Secure

 Cloud SSO	 SaaS & Cloud
 Web Portals	 Digital Signature
 Local Network Access	 VDI
 Physical/Logical Access	 Endpoint Protection
 Remote Access	 Email Encryption

## Products We Offer

<b>Access Management</b>			
			
SafeNet Trusted Access			
<b>Authentication</b>			
			
PKI	Hardware	Fido	OTP Push
			
Adaptive/ contextual	Pattern Based	Voice	Biometric
			
Google Authenticator	SMS	eMail	Password
			
Passwordless	3rd Party	Kerberos	

## Standards-based Security

Thales's solutions offer unparalleled standards-based security:

- FIPS 140-2 validated software and hardware tokens
- Common Criteria certified hardware tokens
- FIDO2 and U2F level 1 certification
- ISO 27017:2015
- ISO 27018:2019
- SOC II Type 2
- GDPR Ready
- CSA STAR Level 1
- DSKPP-secured provisioning of software tokens
- ANSSI certified libraries within software tokens
- Hardware-based root of trust

## About Thales

The people you rely on to protect your privacy rely on Thales to protect their data. When it comes to data security, organizations are faced with an increasing number of decisive moments. Whether the moment is building an encryption strategy, moving to the cloud, or meeting compliance mandates, you can rely on Thales to secure your digital transformation.

Decisive technology for decisive moments.
